

### OVERVIEW

Summit™ Video Conference Walls provide a neat and increasingly popular way of combining all the elements of a VC solution into a neat and aesthetically pleasing unit.

These highly adaptable video conference walls are custom designed to accommodate *your choice of screen, video bar or camera plus speakers*. All neatly packaged within an elegant freestanding unit. Each unit is designed to support either single or twin screens up to 86".

### KEY FEATURES

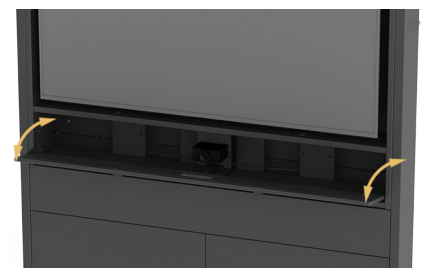

- Installation options include single or twin screen in freestanding, bolt down and floor-to-wall versions.
- Incorporates an Accession™ service mount for easy access to behind-screen devices and cabling.
- Ample storage within cabinet, including 4x slotted removable AV trays (310w x 488h mm each).
- Designed to your choice of screen with ample room for your chosen video conference devices.
- Fully install or service from the front of the unit.
- Optimal camera height of 1200mm.
- Vertical & horizontal zonal air circulation to keep kit running smoothly.

Fully install from the front with secure sliding back panels that offer access to wall-based connectivity.

Built-in Accession™ mount provides efficient and simple access to behind-screen devices and cabling.

Serviceable video conference panel smoothly pulls down to provide access to installed devices.

Custom VC panel options include fabric-wrapping for discrete speaker display.

Custom cut-outs on infill panel allow for touch panels, branding & more.

Custom frame and panel colour options to suit corporate guidelines.

4x removable AV trays offer simple maintenance and can be pre-populated.
